

### **WARNING!**

#### **IMPROPER USE CAN RESULT IN DEATH OR SERIOUS INJURY**

*ONLY use these chains as tire chains.  
NEVER use for towing, lifting, securing,  
or lashing.*

*DO NOT exceed 30 mph (50 km/h).  
Chains can break under tension  
causing hazardous projectiles and  
loss of vehicle control.*

*DO NOT operate with worn, damaged,  
or improperly installed chains.*

*DO NOT use tire chains on dry pavement  
or under conditions where snow or ice  
is not present, as this may cause tire  
damage or loss of control.*

*ALWAYS read and follow full safety  
instructions provided in the QR-code  
link.*

1

Legg kjettingen på bakken bak dekket med piggene opp og stiftekoblingene på banen nærmest dekket. Fest en snor i dekkmønsteret og gjennom stiftekoblingene på både side- og banekjetting. Kjør fremover til hele kjettingen er på plass.

*Lay the chain down behind the tire with studs pointing upwards and the pin connectors facing the tire. Fasten a rope on the tire threads and through the pin connectors both on the side chain and the mesh. Drive forward until the chain is on the tire.*

2

Koble bane/piggkjettingen først. Deretter sidekjettingene. Bruk av strammegang vil forenkle montering og justering. Pass på at mønsteret blir korrekt i skjøten. Husk å slå inn spennstiften i stiftekoblingene.

*Fasten the mesh first, and then the side chains. Using a tightening plier will make it easier to fit the chain properly. Make sure the pattern runs correct through the connection. Don't forget to lock the pin connectors.*

3

Stram til strammekjetting. Fest den løse enden tilbake gjennom ringene. Fest enden i samme kjetting. Ikke i ring. Kjettingen bør etterstrammes etter kort tids bruk. Vi tilbyr også egne strammekjetting-sett for ettermontering.

*Fasten the tightening rail. Thread the loose end back through the rings and secure it in the same chain (not in a ring). After a short while the chain might need to be re-tightened. Tightening rails are also offered as an after market kit.*
