IGLAND RBG 150 ROUND BALE CLAW

Product description

A powerful and flexible hydraulic bale claw. The claw is ideal for gentle handling of bales and are out-shaped so that the bale retains its shape and is then easier to stack height. The claw is low profile, which provides a good overview. Safety valve ensures the the bale remains in the claw during transport. Right and left arm can be locked for easier stacking and gentle handling of plastic. The claw has optional mounting brackets for your loaders.
